# Romastor

## Product

The Romastor is an attachment for the telehandler. It is a rotating fork frame which can realize a gyration of over 360 degrees. Products up to a maximum weight of 2,500 kgs can be lifted and moved in all directions.

In addition, the Romastor is also available with hydraulically adjustable forks.

## Attachment

The Romastor is available for all brands, for rotating as well as rigid telehandlers.

The Romastor can work in the program of the machine concerned.

**2A** The Romastor is patented and possesses a 2A certificate, it has been calculated, tested and approved and has a CE marking.

## Benefit

The additional convenience is achieved by the ability of the attachment to realize a rotating movement of over 360 degrees in a minimum of space.

The Romastor serves for additional convenience when lifting and moving products up to 2,500 kgs.
